Portfolio: dave-ejezie.tech

Personal Profile

Currently enrolled in a paid Digital Skills Bootcamp at JustIT Training as I aim to solidify and build upon previous knowledge of software/programming languages. I have started using new knowledge from the bootcamp by working on new personal projects and adding new features to past projects for my portfolio.

I would like an Apprenticeship role to acquire more skills, gain experience in the industry and broaden my scope of software development methodology and best practices.

Education and IT Training

Oct 2022 - Jan 2023

Just IT Training Ltd, London

Digital Skills Bootcamp: Software Development

A twelve (12) week intensive bootcamp covering the fundamentals of Web and Software development.

2004 – 2005

Somerset College, Lagos - Nigeria

O' Level:

Five (5) credits, Including Mathematics and English

IT Skills

Software Development Skills: Python, Ruby, Node and MySQL

Web Technology: HTML5, CSS3, SASS & JavaScript

Core Programming Languages: JavaScript and Python

Projects: Built a Piggy game and a Bank app that does basic banking operations, both in JavaScript. Currently rewriting the programme for the bank app in Python programming language, will incorporate MySQL for database to store login credentials and banking transactions.

Employment History

2018-2022

Metro Laundry and Cleaners, Lagos, Nigeria

Owner

- As a laundry operator, I was responsible for managing inventory, making sure that every cleaning product is always in place. This saves time of having to look for products during hours work could be done.
- I also ensure that all deadlines are met and that customers are never kept waiting or left disappointed. To meet customer needs, I have sometimes arranged for work to be done at odd hours and employed a late evening office attendant to accommodate customers who are only available to pick up their items in the late evenings.
- I managed a small team of more than three (3) people, I made sure we were all on the same wavelength by keeping communication clear and simple. I ensured everyone was made to feel important by assigning them clearly defined roles.

08/22-10/22

Premium Work Support, London, United-Kingdom
Cleaning Operative

- As a cleaning operative, I was tasked with always keeping the environment clean for the health and safety of staff and clients. I would always try to do more than just the basics, rather I aim for the best standards achievable.

Interests and Achievements

Computing: During my self-learning to become a software developer, I built a banking app with the guidance of a JavaScript course I was taking. I am currently rewriting the programme in Python so that it can have a database for user data storage.

Hobbies:

- Reading about new technologies and trying to understand how they work.
- Playing chess online or with friends and family.
- Football, I play on the field, video game consoles and watching the English Premier League.
